

Individual reflection (Sam)

Week 1

- What do I want to learn or understand better?

I feel intrigued about using Scrum, I have never used it before but it seems promising. I would like to learn more about Scrum and how to set up a project like this. Also, I am excited to work with my team and learn how to create an app.

- How can I help someone else, or the entire team, to learn something new?

It is unclear what strengths I have that the team can make use of so far. However, I have contributed with some takeaways from writing my bachelor's thesis regarding group contract and arranging of roles during meetings for documentation and decision making purposes. We will try this out next week and I hope it can give the group some kind of value.

- What is my contribution towards the team's use of Scrum?

Right now my contribution towards using scrum is reading up on Scrum and trying my best to understand it in order to reduce friction in workflow.

- What is my contribution towards the team's deliveries?

The whole team including myself has contributed with ideas that we could run with for this project.

Questions

- what do I want to learn or understand better?
- how can I help someone else, or the entire team, to learn something new?
- what is my contribution towards the team's use of Scrum?
- what is my contribution towards the team's deliveries?
